

Print to any printer from your mobile device

Multi-platform solution that is printer independent for your enterprise

Key features:

*Access & release
documents at any
printer on the
network*

*No network
reconfiguration*

*No imbedded
MFP software*

*True Application not
web-browser based*

With ROI Mobile Print you can use your mobile device to release your print job when and where you need it.

The most practical mobile print solution . . .

Enhance Mobility

ROI Mobile Print allows you to easily print jobs anytime, anywhere. Suppose you need a handout for a meeting but don't have time to pick it up on your local printer. With ROI Mobile Print simply use your mobile device to "pull" the job to the printer outside the conference room. The whole process is as easy as taking a picture.

Promote Security

No more worries about sensitive print jobs being viewed by unauthorized parties while you rush to pick them up. Use your mobile device for security "authentication" to protect confidential information. Simply select your print job and release your document from your mobile device while standing at the printer.

Save Money

Often individuals will send documents to a printer, forget that they sent it then send it again. With ROI Mobile Print, jobs will not print out until you're at the printer and ready to pick them up. It's good for the environment and your organization's bottom line. Cut costly document shipping costs by printing once at your destination.

Boost Productivity

Send your print job to the device closest to your next meeting or presentation. ROI Mobile Print enables you "pull" the job to a printer that is more convenient. Need more than one copy? With ROI Mobile Print you can print additional copies right from your mobile device, even days later, without having to waste time resending the job to the printer.

Added Accountability

Track print usage to plan for future expenses, track printing costs, bill back to specific parties and manage your printing resources more effectively.

Print to any printer from your mobile device

Multi-platform solution that is print independent for your enterprise

Works with:

Client Mobile App -
Android
Blackberry
Iphone
Ipad
Windows Mobile

Server -
Windows Server
2003 or 2008.
VM

How it works

Get the app:

From your app store download the ROI Mobile Print application.

Get the Server Software:

Visit www.roiprintmanager.com/roimobileprint— from here download the server software.

Workflow:

- a. From your computer – select the ROI Mobile Print Driver then click print.
b. From your mobile device – select the email and attachment you wish to print. Forward the email to xxx@xxx.com
- Your print job is held at the ROI Mobile Print Server.
- Make sure your mobile device has access to the company's wireless network.
- Walk to any printer that is connected to the network.
- Locate the QR code.
- Click on the ROI Mobile Print App – select scan.
- Now scan the QR code.
- Your print jobs will now be displayed on your mobile device.
- Select the job you wish to print and press the print icon.
- Your job will now print.
- ROI Mobile Print keeps your documents at the server for a designated time. You can reprint jobs or delete them from the ROI Mobile Print Server from you mobile device.
